

Applications

Easily programmable to adapt to a variety of asset and personnel tracking applications.

These trackers are ideal for near real-time location tracking applications that are event driven.

The trackers can wake on a variety of events, collect and report location, temperature, and other information.

The CT1000 buttons can be programmed for multiple uses, such as panic alerts.

CT1000

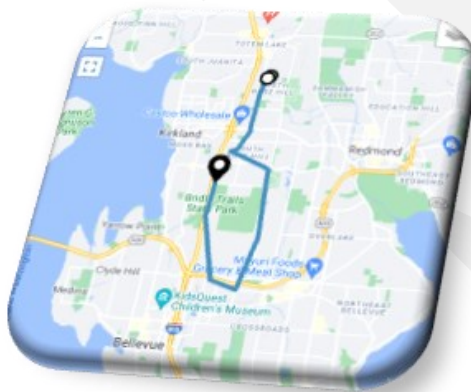

Highly configurable trackers are easily adapted to support a wide variety of use-cases.

- ◆ Workplace security
